Overview

At Strategic Financial Planning Australia Pty Ltd we believe the key to financial planning is taking the time to understand clients' needs, and more importantly, future needs. The more we understand about where you are and where you want to be, the better equipped we are to help you get there. Our role is a technical one, based on knowledge we have accumulated over time through study, research and experience. Together, we will establish a personalised financial 'roadmap' to suit where you are now, and help guide you to where you want to be financially in the future.

The advice and recommendations we offer our clients are based entirely on their personal needs and objectives.

Our service philosophy is simple, the client and the relationship that we have with our clients always comes first. In order to allow us to deliver the best customer experience and service to our clients, we have a limit on the number of clients we are able to service for each financial planner in our team. We have learnt from experience that it's quality that counts, not quantity. We are selective about the clients we provide financial advice for, just as you should be selective about who provides you with financial advice. Selecting us means direct personal service. Experience the difference.
